

Urban Water Services Line Manager

Company overview:

Pöyry Group is a global consulting and engineering firm focusing on 5 business areas: Water & Environment; Energy; Industry; Urban Mobility; and Management Consulting. Pöyry employs 7,000 experts in 50 countries and its 2009 net sales amounted to 740 M€

Pöyry Environment S.A. is a French branch office of Pöyry's "Water and Environment" business area. Pöyry Environment S.A. provides consulting and engineering services in the fields of (1) drinking water and wastewater, (2) water resources management, and (3) environment.

Available position:

Pöyry Environment S.A. is currently recruiting a Manager for its "Urban Water" services line. In liaison with both the General Manager and the International Department Director, the Urban Water Manager actively participates in the development of our urban water services product line in France and abroad. The product line includes management consulting services, master planning, project identification and preparation with IFIs, evaluation and auditing of utilities as well as other cutting-edge areas of the water sector. You will coordinate and manage the work of your team, participate in some projects, and also develop worldwide business opportunities in synergy with other Pöyry companies.

You will participate in commercial development through the preparation of tenders and by developing commercial contacts.

This managerial position requires frequent travel in France and abroad.

Candidate profile:

- Excellent understanding of innovative water utility management practices.
- Strong relationship management skills, teamwork, communication; and analytical, problem solving and organisational skills.
- Has a visionary and practical understanding of the urban water sector in order to identify, develop and provide strategic services to clients in France and abroad.
- Ability to work on large-scale and complex projects.
- Experience both in France and abroad working with IFIs.
- Fluent in French and English (both writing and speaking); a third language would be strongly appreciated.

You are a water engineer with a minimum of 10 years experience as Project Engineer or Project Manager in the urban water sector (potable water and wastewater). In order to excel with the Pöyry S.A. team, you will need to have an excellent understanding and strong interest in the technical, financial and legal issues of the urban water sector and its subsectors, including planning, governance and management.
